

everyone should know they can have a

Successful

career in the construction field

Surprised? The construction industry is facing a shortage of skilled workers. To offset this, Construction Career Days is featuring professional demonstrations and hands-on involvement in some of the most in-demand careers in the commercial construction industry such as bricklaying, engineering, rebar tying, drilling, carpentry, electrical, sheet rocking, and more. Come and participate in hands-on activities including operating heavy equipment such as backhoes, excavators, and jack hammers. Skilled trades people will demonstrate crafts such as bricklaying, concrete finishing, welding, plumbing, electrical installation, materials testing and pipe fusion. Technology based careers associated with construction such as architecture, engineering, estimating and surveying will also be represented. Find out how rewarding a career in construction can be.

Don't miss

Construction Career Days

Wednesday, September 28, 2005 • 5:00-8:30 pm
FAMILY NIGHT for students and their families

Utah State Fair Park • 155 North 1000 West • SLC, UT
